

Automated Reminder Notification

If you are booked for an **Endoscopy procedure** (Colonoscopy, Gastrosocopy, Sigmoidoscopy, Bronchoscopy) you may receive a reminder notification from Labrador-Grenfell Health.

What you need to know:

- Appointment reminders are for endoscopy procedures only.
- The reminder system uses the contact information you have provided.
- Please ensure your contact information is up to date.
- Notifications are made five to seven days before procedure date.
- Three attempts will be made to reach you or to leave a message
- Further information about the new automated reminder system is available at www.lghealth.ca

This **Automated Notification System** is part of a province-wide initiative to reduce missed appointments or 'no-shows'. Reducing **no-show appointments** can improve wait times and access to services for everyone.
