Notice to the Public

Safety and Security at the Labrador Health Centre

Labrador-Grenfell Health wishes to advise the public that the safety of patients and families is our utmost concern as we focus on continuous improvement within our facilities.

The public using the Labrador Health Centre will notice that we have relocated the Security Department to the Emergency Room Department (ER). This will help provide a safe environment for our patients. This initiative will have no impact on the seating capacity in the waiting area.

The public is encouraged to share their feedback on this and any Labrador-Grenfell Health services by completing the [Client Experience Survey](#) or by contacting the [Client Relations Department](#) by:
