

## Labrador - Grenfell Health

### Notice to the public

### Changes to Medication Dispensing at the Natuashish Community Clinic Effective February 8, 2021

The Standards of Practice as set out by the Newfoundland and Labrador Pharmacy Board and the College of Registered Nurses of Newfoundland and Labrador, requires Labrador-Grenfell Health to change the manner in which medications are dispensed at its community clinics along the Labrador coast.

As a result, the Natuashish Community Clinic will **no longer be dispensing long-term prescriptions as of February 8, 2021**. This change in medication dispensing services will continue to be implemented at other community clinics in the future.

This change promotes and protects the rights and responsibilities of clients and follows regulatory standards and best practices for the dispensing of medications.

#### Clients are responsible to:

1. Contact the Natuashish clinic to review active prescription(s).
2. Make an appointment at the clinic one month before prescription(s) need to be renewed. (This information can be found on the label of current prescription medications. Please see sample label below.)
3. Choose a community pharmacy to transfer any active prescriptions from the clinic. (Labrador-Grenfell Health can fax new prescriptions to the community pharmacy chosen by clients, if required.)
4. Discuss medication pick-up/delivery and arrange payment with the community pharmacy. (Only medications filled at pharmacies in Happy Valley-Goose Bay may be picked up at the Hopedale clinic.)

	10-June-2019
60 Tab Metoprolol 25mg	
DIN: 02246010	<b>Refills: 2</b>
TAKE ONE TABLET TWICE DAILY	

Labrador-Grenfell Health will continue to have a small supply of medications in case they are required by clients on short notice. The clinic will continue to provide acute-care medications.

Nursing staff at the Natuashish Community Clinic will be available to answer questions and provide support during this change. For more information, please contact the Natuashish Community Clinic at (709) 478-8842.
